

Split refrigeration units SD series

with semi-hermetic compressors and electronic control panel

BERGCOLD

Refrigeration units in split variant with electronic control panel and high efficiency evaporators.

Split units SDM series

Temperature range for normal refrigeration: **-5°C / +12°C**

Split units SDL series

Temperature range for deep freezing: **-15°C / -25°C**

General features

- Electronic control panel with temperature display
- Semi-hermetic compressors with thermic protection
- Generously proportioned condensers with optimized tube circulations and heat transmission linked to high-performance ventilators
- Evaporator with high efficiency heat exchanger and low consumption fans
- Expansion with expansion valve
- Programmable automatic defrosting
- Robust construction with compact dimensions
- High and low pressure switch
- Liquid line with filter dryer and inspection glass
- Solenoid valve in the pressure line
- Crankcase heater

Options

- Weatherproof housing
- Different voltage
- Oil separator
- Liquid separator
- Watercooled condenser
- Fan speed controller
- Door contact switch
- Master/Slave Function
- Data gathering and remote control
- Voltage monitor
